

Bluetooth Firmware Upgrade Tutorial Using GAIA App

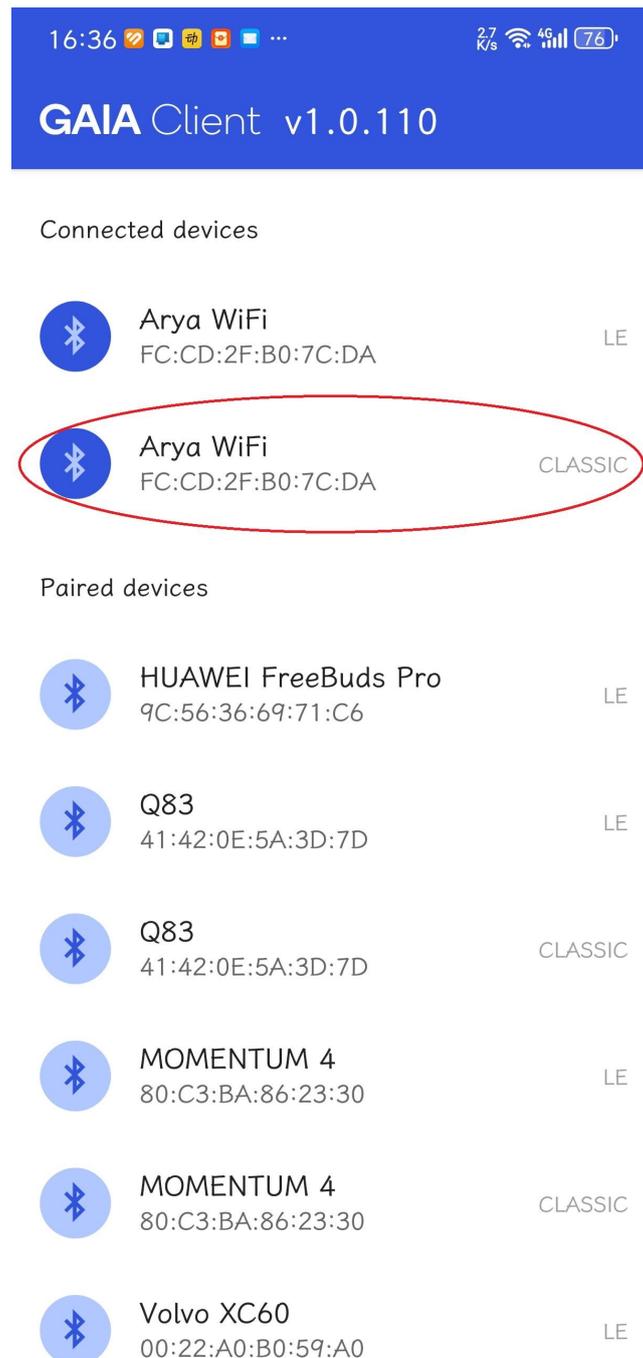

1. Power on your Arya WiFi or HE1000 WiFi headphones, and enter Bluetooth mode. Pair and connect the headphones with your **Android phone**.

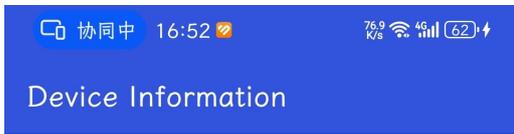

2. Download the Bluetooth firmware file we provided (a *.bin* file), and import it into the **internal storage** of your Android phone.

3. Download the GAIA APK package we provided (*android_gaiaclient_1_0_110_release.apk*), and install the GAIA app onto your Android phone.

4. Open the GAIA app, and at the top under "Connected devices," find your Wi-Fi headphones. Select the one with the suffix "**CLASSIC**" and tap to enter.

5. Click through the following three screens: “Settings”, “Software updates”, and “SELECT UPGRADE FILE”.

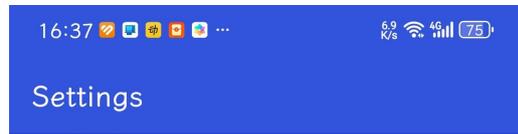

Arya WiFi
